

Usseri Schoolfee-Sponsorship

Tanzania

Friendly people, national parks, the Indian Ocean and Mount Kilimanjaro. Since the end of the colonial rule a lot of positive changes have been achieved: traffic infrastructure, health care, electricity, clean water. With the aid of international organisations a comprehensive educational infrastructure was established. This system provides access to education for all girls and boys.

Drought-prone region Usseri

The effects of the climate change lead to a very dry climate in the region Usseri at Mount Kilimanjaro. The cultivation of corn and coffee is highly limited. A lot of poor peasants and farm workers do not have an income anymore. Appropriate education for their children is the only hope they have for a better future. Unfortunately, more and more families are unable to raise the money for that.

USSERI

Development assistance in Africa

is a registered non-profit association. It focuses on the support and advancement of education in Tanzania. The aim is to give people living there, in particular children and adolescents, the opportunity to live a self-determined and dignified life. Our commitment and the selection of the children are neither dependent on religious affiliations nor on political interests. We respect the people's culture and are dedicated to development cooperation, to solidarity and to global responsibility.

Sponsor a child's education

A child gets the opportunity to visit school for a whole year, if you decide to become their sponsor. 45 € will pay for the child's primary school and for 150 € he/she can attend high school. School uniforms, school supplies and food are included in this sum.

We invite you to sponsor a child's education in the drought-prone region Usseri. The full amount of your sponsor donation will be used for the benefit of a child. For further information please see www.usseri.org.
